To Whom It May Concern

I have worked with Circuit Electric numerous school projects ranging in size from very small to very large. This includes new buildings and renovations over the past 10 years. We just complete a 280,000 square foot lighting renovation to a large High School that had a construction schedule over two summers. I also worked with Circuit Electric on a new 140,000 square foot new Middle School that I would consider to have a lot of architectural features including many exposed ceilings.

Circuit Electric has shown that they can handle large renovation projects and still meet the schedule as well as pay great attention to detail in buildings with a lot of architecture. I have witnessed a commitment to providing a successful project regardless of the size of the project. They have shown the ability to have a good look ahead on projects to catch potential issues before they become issues. It has also been my experience that Circuit Electric is very fair and open when it comes to change orders and many times just take care of issues that come up in the field.

If you have any additional questions feel free to contact me at 269-207-9247.

Sincerely,

Lentz Becraft
